

COMP3512 Chapter 16 Instructions

This lab will provide you with some experience using MySQL in PHP.

1. Using a web browser, visit <https://github.com/rconnolly/comp3512-f2017-chapter16>.
2. In a new browser tab, start Cloud9 and login.
3. Create a new **public** workspace named **comp3512-php-4**. In the Clone from Git field, enter **<https://github.com/rconnolly/comp3512-f2017-chapter16.git>** and select the **PHP** template. Click the Create Workspace button.
4. Once the workspace is loaded, you will find a step-by-step lab (see lab16.pdf). I strongly recommend you first work through these steps since you will need to learn how to make use of cookies and session state.
5. Complete Chapter 16 Project 1 for Oct 20 (two weeks from now). These chapter numbers refer to the Second Edition. If you don't have it, then you can use the PDFs that have been provided.
